Sports and multipurpose floorings

**Product description and Technical Specification** 

Rubber pads made of SBR ( Styrene Butadiene ) rubber granules compounded with polyurethane binder designed for sport areas covering, pedestrian areas, parking places for light vehicles . The pads are equipped with the holes to be used with plastic connector for the pads dry application. The upper surface is smooth and anti-slip, while the bottom surface is shaped to get high protection on impact falls. The pads are available in the size of 500 mm or 1000 mm side with the thickness of ....mm

On request special colours are avaible

- Protection upon impact on the ground
- Easy installation and maintenance, non-toxic
- High durability in time

PHYSICAL AND CHEMICAL PROPERTIES	Norm	20	30	40	50	
Fire resistance	EN 13501-1	Efl, E				
Temperature tolerance	nperature tolerance		- 40° C ; + 80° C			

#### **PACKING AND STORING**

Each pallet is wrapped and protected with waterproof polythene film. Inside storage is recommended to avoid possible water penetration.

#### WARNINGS

Make sure all the pads have the same temperature during the entire installation period. Lay down the pads 24 hours before the installation to allow them to get their original dimensions.

Install all the pads in a single laying session in order to guarantee installation under similar conditions.

### INFLUENCE FROM ATMOSPHERIC CONDITIONS

REV

1.3

### INSTALLATION INSTRUCTIONS

The installation surface must be flat, stable and protected from frost. The best substrates are leveled bed of gravel (grain size: 0-7 mm, water-permeable) or concrete. On a gravel base the only possibility is a dry laying; on a rigid base (asphalt, concrete ...) the product can be dry laid or glued.

For more information, refer to the installation manual downloaded from the website www.isolgomma.com
