

# SPECIALTIES FOR STONE

## ADHPI

**adhesive for stone placing**

Adhesivo en polvo de secado más rápido, una mayor resistencia mecánica que los cementos cola, con capacidad de deformación y propiedades impermeables. Reduce el riesgo de manchas por humedad y el riesgo de eflorescencias. Para mármol, granito, y piedra en general.

Tipo C2 T según UNE-EN 12004  
Coverage: 3 at 5 Kg/sqm Package: 25Kg

## COAIS SUPERGEL

**super cleaner agent in gel consistency**

Formulated in base of acid substances, surfactants and rust inhibitors which allows a better wetting, penetration and removal the areas to clean.

Suitable for cleaning work wastes, cement, lime, rust and salts. (It is recommendable to do a previous test).

Coverage: 10 a 15 sqm/l Package: 1l, 5l, 25l

## UNIPIS

**quick adhesive for marble, granite and stone**

Two-component product. When is blended it works as thixotropic paste ease of applying in vertical and horizontal. It is used in construction, reparation and restoration for marble pieces, granite and stone, hollows in terrazzo, etc... It allows the polished, good resistance against wear and excellent adherence. Available in several colours.

Coverage: 1,5 Kg/sqm Package: 1.5Kg, 8Kg

## REPAIS ANTIVERDIN

**water repellent for faced facades and anti-slime.**

It works as a water repellent avoiding wastes, glosses and allows transpiration. At the same time avoids the slime on surfaces where it is applied on.

Suitable for cleaning work wastes, cement, lime, rust and salts. (It is recommendable to do a previous test).

Coverage: 6 sqm/l Package 1l, 5l, 20l

## LASTOIS ROCA

**special sealant for stone works.**

Plastic sealant with high resistance. Once it's cured becomes waterproofing and be painted with water-paints.

For filling and sealing of cracks, joints, chimneys finishes, fibercement, gypsum, concrete, stone pieces, marble, etc... For sealing where there are not permanent moisture.

Coverage: 1,65 Kg/l Packages 310cc

## REPAIS

**translucent water repellent in liquid shape**

It penetrates on the surface and not remains neither waste nor glosses achieving its property of water repellent allowing the transpiration of the material and avoiding the dissolution of soluble salts. Mainly suitable for porous supports made of stone or non glazed supports, faced concrete, faced brick, etc...

Coverage: 6 sqm/l Packages: 1l, 5l, 20l

## PROPI

**waterproofing agent for stone**

Varnish based on resins with high adherence and resistance suitable with mineral supports such as stone.

For the treatment of slate slabs and stone pavements. It decreases the risk of spots, give a wet look and increases the cleaning. It enhances the surfaces where it is applied on.

Coverage: 4 a 6 sqm/l Packages 1l, 5l, 20l

## TEAIS IDROF

**waterproofing agent for exterior pavements**

It protects passable pavements terraces, covers, etc... Decreases its absorption and filtrations produced by the porosity of the materials.

Suitable for ceramics, stoneware, natural stone, clay both in terrazzo and covers.

Coverage: 8 a 10 sqm/l Packages: 1l, 5l, 20l

## FIJOPI

**breathable superficial hardener**

It is applied on all types of stone and mineral supports which tend to superficial disaggregation such as fillings on walls, lime mortar joints, etc...

If is required to harden it a deep consolidating treatment with ENDUPIS must be done firstly.

Coverage: 6 a 7 sqm/l Package: 0.75l, 5l, 20l

## LIPIS

**microorganism cleaning agent and residual pollution**

Concentrated product for cleaning and removing microorganism and dirty.

It is used on natural and artificial stone, concrete, brick, fibercement, slabs, stoneware, rough cast, wood, etc... It cleans mold and moss.

Coverage: 5 sqm/l Packages: 1l, 5l, 20l
