

TECHNICAL DATA

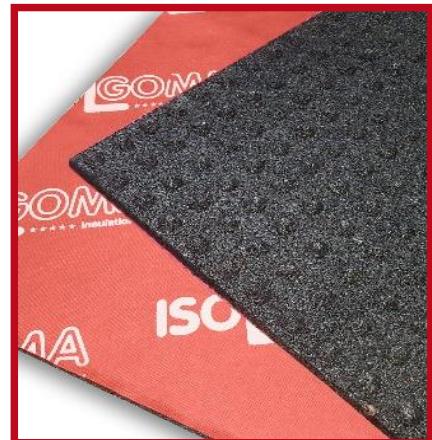

Megapoint

Vibration insulation

Product description and Technical Specification

Anti-vibration material supplied in panels, with a dimpled shape on one side with a thickness of 25 mm, produced using fibres and granules of SBR rubber (Stirene Butadiene Rubber), selected and compacted using a polyurethane glue in a hot process. A non-woven, non-stretch waterproof synthetic membrane is applied on one side of panel, for added protection; total superficial weight is 10 kg/m². Panels dimensions are m 1 lenght, m 1 width.

- High performance in reduced thickness
- Easy to lay
- Durable material

Area of application	Compression load	Deflection
Static range of use (static loads)	0,002 N/mm ²	5%
operating load range (static plus dynamic loads)	0,002 ÷ 0,04 N/mm ²	5% ÷ 30%
load peaks (short term, infrequent loads)	0,10 N/mm ²	40%

Area of application		2,00
Megapoint	Pad/Stripe	1,20
ME500	ME650	0,70
ME800	ME950	0,35
		0,20
		0,10

specific load (N/mm²)

PHYSICAL CHARACTERISTICS	Standard	Unit	Megapoint	Tolerance
Nominal thickness		mm	25	± 1
Length		m	1,00	± 0,01
Width		m	1,00	± 0,01
Superficial weight	kg/m ²		10,0	± 5%
Backing superficial mass	g/m ²		110	
Colour			black / red	

TECHNICAL CHARACTERISTICS	Standard	Unit	Megapoint	Tolerance
Stress at strain 10%	EN 826	N/mm ²	0,005	± 10%
Static Modulus of Elasticity (Es) - strain 10%	EN 826	N/mm ²	0,052	± 10%
Dynamic Modulus of Elasticity (Ed) - strain 10%	UNI 11059	N/mm ²	0,259	± 10%
Loss factor (η)	UNI 11059		0,148	± 10%

PHYSICAL AND CHEMICAL PROPERTIES	Standard	Megapoint	Tolerance
Temperature range of use		-20 °C / +110 °C	± 5%
Inflammability	EN 13501-1	E

Laying instruction

Bearings

Place the Megamat plates or strips dry and place the machine on them.

Floating Base

Follow the installation instructions below.

1

Build the containment foundation pit, taking care that the surfaces of the base and sides are clean and free of bumps.

2

Lay the Megamat panels taking care of placing them without leaving gaps or cavities along the edges of the joints.

3

Seal the horizontal joints carefully with the Stik tape.

4

Glue the panels on the sides of the trench by smearing glue on the entire surface or distributed by spots, install the panels side by side without leaving gaps or cavities along the edges of the joints.

5

Seal vertical joints carefully with the Stik tape.

6

Build the concrete foundation in the pit directly on the Megamat layer.
