

WESTHINDER – LIGHTSHIP - BELGIUM

The lightship "Westhinder" has been treated with ZINGA in 1998. After sandblasting to a degree of Sa 2.5, ZINGA and topcoats were applied.

Pictures of the Westhinder before the renovation started.

Above the water line, 1 x 80 μ m ZINGA was applied, overcoated with 2 C Epoxy Sealer MIO and Uretex Navy.

The same system was used under the water line, with an additional anti-fouling layer.

**System :**

ZINGA 1 x 80 μ m
2 C Epoxy Sealer
Uretex Navy

Pictures after ZINGA application and topcoating.
